Device for generating electrical, magnetic and/or electromagnetic signals for treating the human body, and method for operating such a device

Abstract

The invention relates to a device for generating electrical, magnetic, and/or electromagnetic signals, which, at different treatment frequencies, can be used to treat the human body, an electronic noise element (22) being provided as a means for providing a noise signal, which noise signal can be used for the selection of a treatment frequency, the properties of which electronic noise element are at least partly dependent on at least one biophysical radiation emission of the human body.

Composition for preventing and/or treating coronavirus infection CN112043688A

. The composition comprises beta-caryophyllene, derivatives of beta-caryophyllene and/or pharmaceutically acceptable salts of beta-caryophyllene, and preferably, the coronavirus is SARS-CoV or SARS-CoV-2. It is found that beta caryophyllene can effectively inhibit SARS-CoV-2 from entering ACE2 high-expression cells, so that replication of novel coronavirus can be effectively inhibited, and therefore, the composition provided by the invention can effectively prevent and/or treat diseases caused by coronavirus infection and can be used as an anti-pneumonia drug.

19:58:32 From Belinda to Everyone:

ABS - COVID deaths for the 2020 year to August 2021 totalled 1016 (and lets not forget this was when the deadly Delta variant was running rampant) but from September 2021 to February 2022 total deaths were 3078 (mandates introduced). Victoria (the most locked down city in the world) makes up over 50% of these deaths?

19:58:58 From Julie Parker to Everyone:

Great, Jay!

19:59:19 From Fiona to Everyone:

20:00:52 From Fiona to Everyone:

I spoke with Dr friend about this re heart & also mentioned Mathew Lloyd & Bells palsy & he said both virus related... UMMM coincidences 🤔

20:01:36 From Jules NSW to Everyone:

A wealthy elderly man with a high value Life Insurance policy to the amount of millions of euros... dies from the covid jab. His death as a consequence of being jabbed is not disputed by the doctors, nor his life insurers. The Insurance company refused to pay the policy, citing that the taking of experimental drugs, treatments, etc., is excluded from the policy. The family takes the insurance company to court and they have just lost the case.

20:01:40 From Julie Parker to Everyone:

Twice is a coincidence...three or more....a conspiracy?

20:02:05 From Fiona to Everyone:

😊 & we have plenty

20:02:18 From Jules NSW to Everyone:

The judge stated, "the experimental vaccine side effects are publicised and the deceased could not claim not to have known about them when he voluntarily took the jab.

There is no law or mandate in France which forced him to be jabbed. Therefore, his death is essentially suicide".

Suicide is explicitly excluded from this particular policy and in fact from all life insurance policies in general.

This has been the finding of a major western world court system and there is zero doubt that insurance companies world wide will cite this case as legal fact.

20:02:20 From Julie Parker to Everyone:

Wow, Jules - that is good info - the reasons why policies are not being paid out on.

20:02:23 From Jules NSW to Everyone:

Therefore, if anyone ever challenges you on whether these jobs are experimental or not, and that neither the pharma companies, nor govts, nor anyone else but YOU are responsible for accepting them and if you die, legally you have committed suicide. No insurance, no payouts, no refunds. You are on your own!

This is on the government health website "Vaccination for COVID-19 is voluntary – as are all vaccinations in Australia – and people maintain the option to choose". Now lets look at the definition of "voluntary":

1. Done or undertaken of one's own free will.
2. Acting or done willingly and without constraint or expectation of reward.
3. Normally controlled by or subject to individual volition.
