I normally do not listen to lengthy videos these days. I made an exception for this one on Serene Taffafa, a top-notch lawyer - which I listened to at 2 x speed. 2.5 hours. I rate her as the smartest & bravest person in Australia. For inspiration when you need it.

The Parliament needs to accept Natural INNATE Immunity

19:18:51 From Simon to Everyone:

The British government admits that the vaccines have damaged the natural immune system of the double-vaccinated people. The UK government has admitted that after a double vaccination, one will never again be able to acquire complete natural immunity to variants of Covid - or possibly any other virus. So let's see how the "real" pandemic starts now! In its Week 42 COVID-19 Vaccine Surveillance Report, the UK Health Authority admits on page 23 that "N antibody levels appear to be lower in people who become infected after two doses of vaccine". It goes on to say that this drop in antibodies is basically permanent. What does that mean? We know that the vaccines do not prevent the infection or transmission of the virus (the report shows elsewhere that vaccinated adults are now much more likely to be infected than those who are not).

My research is leading to the point that the people elimination is not so much as a consequence of the virus, but the weakening of the immune system as discussed in the UK article. The virus is only the tool for the hypnosis through the establishment of fear of death. So the focus is on the immune system
