19:09:43 From anthony to Everyone:

I received a notice for Jury Duty yesterday. The accompanying notice for exemptions said I could be excused for being over 70. It did not say anything about vaccination status on the form. It advised to go online, which I did. I duly filled in that I was now 70 and the computer replied that I would be answered in 5 five days. Online it asked about vaccination status, and I duly answered NO to first vax, NO to second VAX and NO to booster. I immediately got a computer reply saying I was excused from Jury Service for ever! This means that non-vaccinated people are not allowed on juries. So I thought about this and the lawyers among you may conclude that you cannot have an impartial jury in covid law cases, if all the jurors have taken the jab and already are part of the system.

I dont have either LOL

19:17:51 From Jules NSWdjA to Everyone:

This week, a friend of mine had to go to court for not wearing a mask. He put this incredible story of what happened in a video.

Talk about a system designed for the common man to lose. He was fined and the judge, threatened him with a criminal record. (He has lived here as a permanent resident since 2007.) Judge said it would be difficult for him to get citizenship with a criminal record.

He was told "They have to make an example of him." He has more fines to fight. If anyone can help, please let me know. Thank you.

Many people in Oz have various machines, e.g. SCIO, BiCom, Mora, Vega etc and they can tell whether you have picked up any of the shedding and they can get rid of it for you. Another thing is Oregano oil immediately after the jab and use a magnet on the spot. There are literally tons of protocols but good to get tested to see which specific one is good for you because each human is different and thus Vit C is great but WHICH one works best for YOU etc. Learn to muscle test yourself and then you will know. Xxx

Conflation of arguments is evident in mainstream media care should be had not to accept the narrative by mainstream media that we are all anti vaccination when there is mandates, vaccine passports, vaccinating children where the risk to children from 6 months to 11 years of age is 0.005 percent. Or to express it another way 99.995 percent survival rate.

Dr Craig Paardekooper has correlated the vaccine adverse effects with batch numbers. The research revealed that your batches EN6198-EN6208 have peak toxicity of 2200-3000 adverse effects per batch recorded in VAERS, your next toxic batch series ER8727-ER8737 have a high toxicity OF 1500-2500, your NEXT batches EW0150-EW0198 contain 26 batches with a high toxicity OF 1200-2000 and finally your batches E30130BA to 30155BA CONTAIN F-series range toxicity of 100-750. Were your batch numbers used by Pfizer to label and monitor experimental conditions of high toxic batches given to the public?

My friend would not join to his name when he went to court. He asked them to recognise that he was a living man. So they kept him outside and used intimidation. He was concerned that they would treat the situation as if he was not in court and he would get a larger fine. He told the policeman that he was a living man and would not provide his details. It was on the policeman's camera, he thought he could use this. They would not accept it.
