Fi...some evidence here <https://foamgroup.online/kims-research-analysis/>

20:22:50 From Jules to Everyone:

A wealthy elderly man with a high value Life Insurance policy to the amount of millions of euros... dies from the covid jab. His death as a consequence of being jabbed is not disputed by the doctors, nor his life insurers. The Insurance company refused to pay the policy, citing that the taking of experimental drugs, treatments, etc., is excluded from the policy. The family takes the insurance company to court and they have just lost the case.

The judge stated, "the experimental vaccine side effects are publicised and the deceased could not claim not to have known about them when he voluntarily took the jab.

There is no law or mandate in France which forced him to be jabbed. Therefore, his death is essentially suicide".

Suicide is explicitly excluded from this particular policy and in fact from all life insurance policies in general.

20:22:54 From Jules to Everyone:

This has been the finding of a major western world court system and there is zero doubt that insurance companies world wide will cite this case as legal fact.

Therefore, if anyone ever challenges you on whether these jabs are experimental or not, and that neither the pharma companies, nor govts, nor anyone else but YOU are responsible for accepting them and if you die, legally you have committed suicide. No insurance, no payouts, no refunds. You are on your own!
