Talking of the Matrix, I love this quote: Remember this in 1999? "The Matrix is a system, Neo. That system is our enemy. But when you're inside, you look around, what do you see? Businessmen, teachers, lawyers, carpenters. The very minds of the people we are trying to save. But until we do, these people are still a part of that system and that makes them our enemy. You have to understand, most of these people are not ready to be unplugged. And many of them are so inert, so hopelessly dependent on the system that they will fight to protect it."

"Unfortunately, no one can be told what the Matrix is. You have to see it for yourself."

"The Matrix is the world that has been pulled over your eyes to blind you from the truth."

"The Matrix is a computer-generated dream world, built to keep us under control in order to change a human being into this."

- Morpheus.
