Gerry Brady made these notes about the video above

If you are in a rush, start at 14 minutes 30 seconds.

NOTE that Pfizer employees batches were "not tested" -- they picked their own batches (!).

NOTE the information at the 40 Minute mark about Thawed vials (!) and Extended Expiry Dates.

His conclusion at 43 Minutes 35 seconds is disturbing.

Doctors in Australia were sent a letter telling them not to speak against the vaccine. My friend in Bali heads up the women's health department at a university in Brisbane. She's an anti-vaxer and she said Australian Doctors are not even allowed to be neutral on the vax - must be positive.

19:38:40 From Julie Parker To Everyone:

Can't even be neutral! We have people on this meeting who have been directed by AHPRA.

19:38:54 From Louise To Everyone:

Health minister Mark Butler says that although there are rising case numbers and a 'soup of variants', Atagi is not advising Australians to get a fifth covid vaccination dose. New booster recommendations will be made in early 2023 in preparation for the southern hemisphere winter, Butler says. The health minister said Atagi had watched a recent Covid wave in Singapore which they described as 'short and small'. The wave had low cases of severe illness and death and it was concluded that a fifth dose of the vaccine would have had a 'minimal' effect on transmission

19:48:49 From Marina To Everyone:

5th vaccine not recommended till early 2023 :)

19:49:29 From Scott To Everyone:

Listening to you all today, really makes me feel better. So happy you are out there doing the great work you are doing.

19:49:30 From Louise To Everyone:

also..... Dr William Bae - he has a case in progress as AHPRA as a Corporation. If he wins AHPRA will be dismantled. He is going into the Queensland supreme court in March. Most likely they will dismiss his case and then go to the High Court.

19:49:30 From Tess To Everyone:

19:55:19 From Scott To Everyone:

Tess, that's really interesting.

19:55:53 From Sheree To Everyone:

I know of a story of a young downs syndrome girl (about 17) who was killed by the doctors in the hospital in America. They wanted to give her remdesivir, but her father stopped it but her doctor signed a DNR for her and gave her a lethal dose of a combination of medication. Her family was screaming for the doctor and nurses to help her and they refused due to the doctor's DNR.
