Somebody's selling a new religion

Somebody's selling a lie

Somebody wants all the strife and division

That's driving us out of our minds

They're telling the world not to trust their own eyes

They're telling the people they're wrong

They're keeping the truth

For their power and gain

And taking whatever we've got

And some of you eat all the lies you've been fed

Some of you just go along

Training acceptance inside of your head

To give them whatever they want

You're leaving your brothers and sisters behind
You're told it's the best thing to do
You're shutting out friends 'cause you're told that's what's right
Now they win because all of us lose

And it's so sad
Watching these times as they change
And it's so bad
The battle's been violent and strange
As they lock us indoors
In a prison of this silent war

Now someone is trying to sell you the cure
The same one who made the disease
And they'll try to convince you
and make you feel sure
But hey, there ain't no guarantees

They covered your mouth and they've tied

Dear Minister Park I have written to Minister Hazzard asking for a denial that Kerry Chant is not married to one of the top private pathologists in NSW- Australia. As the PCR test was banned by the CDC (Center for Disease Control in late 2020) as not fit for purpose, this would be a huge conflict of interest. If it is indeed the case, I am asking for her resignation and apology to the public.

19:51:03 From Pasquale to Everyone:

WHO amendments work group meeting

19:51:27 From Tess to Everyone:

If Kerry Chant is the wife of one of the top NSW private pathologists, her behaviour could be deemed a major conflict of interest at best, and at worst, it is a jailable offence of defrauding the public by recommending a procedure (the PCR Test) that she stood to gain from financially at a time when she should have known it may be and then was banned in the US.

The man who invented the PCR test, Dr Kary Mullis stated that government scientists, like US Dr. Anthony Fauci do not understand science. Mr Mullis's University faculty even sent Dr Fauci an invitation to a scientific debate. Unfortunately, Dr Kary Mullis died just prior to the pandemic, and was not around to calibrate the PRC test. As covid is a derivative of the common cold, the test has

apparently been giving as much as 97% false positives. (as reported by the New York times based on clinical evidence)
