Pfizer has reported a loss of \$ 2.4 Billion for their latest quarter of operations. Sales of their Covid vaccine have collapsed with only 2 – 3 % of Americans prepared to take their latest booster jab. The general public have woken up. Pfizer's revenue fell by 42 % and they had to report a \$ 5.6 Billion write down on unused inventory. To make matters worse, there are reports hundreds of job losses as the company attempts to save \$ 3.5 Billion in costs. BOOM has heard rumours of some staff not being paid (which, of course, may not be true) and two manufacturing plants are being closed in North Carolina.

A Preview of BOOM's Editorial to be published on Sunday -- More here -- The first time BOOM warned of this was over 2 years ago, in June 2021. MRNA technology is now under a very dark cloud and may have no future. Legal challenges are now in their thousands and large class actions are amongst them. Billions or perhaps Trillions of Dollars could be at stack.

A good news. I am on work cover and the work cover refused to pay me for my second job what I used to have, "because I volunteer stud down" choosing to don't have the 🎯. Last week was court day and my lawyer and barrister said is unlikely to win because I am in a grey area, depends of the interpretation and that my case is very complicated and they didn't have a case like this going to court. Anyway after 3 hours of consultation between my barrister and the work cover barrister they settled out of court and decide to pay me. Praise God.

Some good news to share in Australia, NZ, UK and globally.

Covid jab big lawsuit (national class action) in Australia (developments established since late 2022). Julian Gillespie (Lawyer and former Barrister) has written his first article on Substack about ACVVCA (Australian Covid-19 vaccine Victims Class Action). Seed funding has already raised AU \$1.6Mil for \$2.5M required. Exciting read. Great initiative with very supportive reply comments too.

The kind of surgeries required for gender transition are not cheap; Scott Newgent's story includes horrible complications in going from female to male. "Altogether, her medical expenses to both her and her insurance exceeded \$900,000," Walsh reports. I took this off the shelf to lend to some tradies enlarging our roof. Then when this came back, I actually started to read it. For health benefits please go to a library and borrow this, and read it. I have been doing this Yogic Flying since June 1979, almost every day, and while mainly hopping, sometimes better. The effect on the mound is to use much larger percentage of the mind than the 10% or 125% we usually use. Gerry. I will try to show on the screen.

President Lyndon Johnson dropped the USA requirement to keep the USA economy so that it bought gold at \$32 USA per ounce. His excuse 'you can't eat gold'. Then the whole economy slowly slid into the hands of the banks, with deficits every year, from about 1967. Gerry C.

The interest cost can be paid easily by issuing a bond for that amount. Investors will buy the Bond in a heartbeat

We are facing a loss of confidence in the ability of ANY government to pay off their debt. They will hardly find takers for such bonds unless at a high rate which will then increase the debt expenditure... Or am I missing something?

In the municipality of Streaky Bay, please look at the maps of small towns, and ensure all blocks can have homes built upon them. If a block has been wrongly, wrongly wrongly rezoned from residential to "Conservation" or "Farming", ensure that a home can be built by changing the text of the planning scheme. Gerry.
