Chat GPT assessed it, AJ, and this was the result: The document in the image appears to be a part of a contractual agreement, specifically the "Purchaser Acknowledgement" clause, which outlines the responsibilities and acknowledgements of the purchaser regarding the COVID-19 vaccine. This type of clause is found in several agreements between Pfizer and various governments or organisations.

In these agreements, purchasers acknowledge that the vaccine and its components were rapidly developed due to the emergency circumstances of the COVID-19 pandemic and will continue to be studied after provision. They also acknowledge that the long-term effects and efficacy of the vaccine are not currently known, and there may be unknown adverse effects. Additionally, the product shall not be serialized to track individual doses (Law Insider) (WLT Report) (Children's Health Defense).

19:10:05 From Julie Parker to Everyone:

Replying to "202408021904110000.jpg"

This specific clause has been highlighted in various reports and articles discussing the transparency and terms of vaccine procurement agreements, especially concerning the responsibilities and liabilities of the purchasers and the manufacturers.

For further details, you can refer to the full agreements and discussions available on platforms such as Law Insider and reports by various news outlets like Al Jazeera and Children's Health Defense (WLT Report) (Children's Health Defense).

Article ARTICLE- In a world where the RELIGIOUS and MEDICAL HUMAN RIGHTS of millions were recently trampled on by our governments, sometimes it's good to focus on the strength of our own human rights. For where we fail to stand up for ourselves, how can we stand up for others?.

YES, I was able to prove in the Australian Human Rights Commission that the Covid vaccine mandates were a breach of my religious AND medical human rights.

One aspect in particular is because we are injecting other peoples DNA into us, which has to be extracted from a live baby/fetus and takes sometimes multiple attempts from multiple live fetus's to get that viable sample.

In a recent letter to me (to be continued)

19:19:49 From Tess to Everyone:

the Australian Health Minister admitted that yes they use human DNA in virtually all of the vaccines.

My government have failed to answer question's about where the foetal human DNA came from for the Covid vaccine, when key research was done in China.

My government avoided my question, were Chinese women prisoners used in forced abortions to extract the DNA used in those vaccines and was a valid consent given to do so.

Here in Australia we have many refugees who have expressed that they were re-traumatised by the recent breach of medical and religious human rights they experienced in this country, when they came to this country to escape that behaviour.

Ten years ago I was almost denied entry into my country because I hadn't had the Zeka virus vaccine, when that virus was proven to be relatively harmless and the cause of birth defects in northern Brazil due to spraying of pesticides.

With rumours of another vaccine coming out and more mandates and lockdowns please stand up for

With rumours of another vaccine coming out and more mandates and lockdowns please stand up for the human rights of those of us in all countries including the first world countries, so that our refugees do not feel like they've just come out of the frying pan into the fire. 🔥

We already know that the MMR contains DNA from the forced abortion of a severely mentally ill woman in the UK, and that her baby was kept alive while multiple attempts were made to extract his stem cells DNA. 🧬

🙄 Is this what you really want to be injected into our children?

Our refugees can't even enter this country or start work in some organizations. without a barrage of Vaccines when there are other alternatives such as inoculations.

🙌 Thank you for standing up the human rights of these babies and their mothers. .
