Being in dental, I follow the rulings around the forced medicating of communities with fluoride. There has been a win in California: WE WON! Federal Court Rules That Fluoridation Chemicals Pose An "Unreasonable Risk" To Health

History has been made. After 7 years of pursuing legal action against the U.S. Environmental Protection Agency (EPA) over the risk posed to the developing brain by the practice of water fluoridation, the United States District Court of the Northern District of California has just ruled on behalf of the Fluoride Action Network and the plaintiffs in our precedent-setting court case. A U.S. federal court has now deemed fluoridation an "unreasonable risk" to the health of children, and the EPA will be forced to regulate it as such. The decision is written very strongly in our favor, and we will share it in its entirety tomorrow. Below is an excerpt from the introduction of the ruling:

19:17:22 From Julie Parker to Everyone:

"The issue before this Court is whether the Plaintiffs have established by a preponderance of the evidence that the fluoridation of drinking water at levels typical in the United States poses an unreasonable risk of injury to health of the public within the

meaning of Amended TSCA. For the reasons set forth below, the Court so finds. Specifically, the Court finds that fluoridation of water at 0.7 milligrams per liter (“mg/L”) – the level presently considered “optimal” in the United States – poses an unreasonable risk of reduced IQ in children..the Court finds there is an unreasonable risk of such injury, a risk sufficient to require the EPA to engage with a regulatory response...One thing the EPA cannot do, however, in the face of this Court’s finding, is to ignore that risk."
