

1. Signed up to Net Zero rather than declare that "Climate Change" is a scam.
2. Did nothing whilst in power to ensure that teachers in the education system were actually teaching children that climate change is a scam, that the settlers of Australia did not wantonly massacre Aborigines, that Aborigines occupied this land, they did not own it... and so the list goes on. They did nothing.
3. The difference here is that the LNP have become earnest advocates of nuclear energy but the reality is brown coal produces electricity far cheaper than any nuclear facility in the world today. With molten salt reactors that may change but, at the moment, nuclear will not provide Australia with the cheapest electricity possible and that should be the aim of any Government.
4. Sold off water rights to foreign interests and corporate entities. In this there is the strong stench of corruption. Besides which it is just plain idiotic.
5. Leased the poles and wires of NSW such that consumers will be, for 99 years, paying off the billion the purchasers paid for the rights to own and operate the network.
6. Been active participants in signing International Treaties that erode the bodily autonomy of citizens, ownership rights of farmers and contribute to the high cost of fuels and electricity in Australia.
7. Deindustrialised Australia such that it is so dependent on China for manufactured goods it could not sustain a conventional war.
8. Failed to develop self-sufficiency in liquid fuels but are, instead, an importer of same.
9. Failed to hold a referendum to have Section 51 subsection(xxiv) of the Constitution rescinded and a new clause inserted that would forbid any Government or Government funded entity throughout the Commonwealth from passing laws or constructing regulations that discriminate in any way on the basis of a citizen's race, sex or ancestry. If this should be done then the Aboriginal Industry and Native Title would be ruled to be unconstitutional. This would save the taxpayer at least \$30 billion per year.
10. Failed to require that the Aboriginal Industry be audited and those persons who have been misappropriating money prosecuted.

Failed to propose a team, similar to DOGE in the US, and preferably manned by foreign nationals like the late Adam Andrzejewski of "Open the Books", to conduct the study. (KPMG and PWC have produced disappointing results in the past and are not to be trusted.)

11. Failed to take any meaningful action to remedy the lack of affordability of housing and rental by failing to:

- a. rein in unbridled immigration (see amazing speeches by Matt Barrie on this subject <https://www.youtube.com/watch?v=VHtAHw1u15g&t=1434s>);

- b. release land for urban development, hiring contractors on competitive tender, to develop that land to serviced-building block stage where it may then be sold to young married couples (neither of whom may have ever owned a house) at cost with the caveats that:

- (1) building must commence within 12 months of purchase,

the resultant house and land may not be sold for 10 years after the house is completed,

(2) the couple may move into the house as soon as the builder deems it fit and safe for habitation, and

this scheme is exempt from any regulations mandating energy efficiency; and

(3) prohibit any foreign national from owning residential land or farmland under any circumstances.

12. Entered Australia into a number of Treaties that have effectively ceded some degree of sovereignty over Australia to foreign organisations such as the UN.

13. Denied early treatment for COVID-19 resulting in the deaths of thousands of elderly Australians and played an active role in mandating that all persons in employment in Australia, especially those in health, police and the armed forces, must be injected with an experiment gene therapy that is now proven to have killed and maimed millions of people worldwide. Coupled with this all have refused to have a proper and thorough enquiry into the management of COVID-19 and prosecute those persons who are responsible for the untimely deaths of thousands of Australians.

14. Banned the development of nuclear energy in Australia and taken no action to rescind that or put the question to the Australian people by way of a Referendum.

15. Supported and, in fact, facilitated the suppression of free speech in Australia, starting with 18C of the Racial Discrimination Act which effectively legalises discrimination against white citizens.

16. Done nothing to get rid of the minimum wage, "unfair dismissal", superannuation, workers compensation, long service leave and leave loading; all of which is crushing small to medium sized businesses in Australia.

17. Done nothing to modify the law regarding superannuation funds so that commissions do not flow to trade unions and, from there, to the trade unions' political arm, the Labor Party.

18. Allowed, even facilitated, every Government webpage to have a "Welcome to Country" statement at the bottom of the page and enthusiastically supported the flying a seditious flag called the "Aboriginal Flag" in public and Government buildings.
