Evening, lovely Sharon :-)

18:50:16 From Sharon C , Wollongong NSW to Everyone:

Hi,

I have just written a blog and posted it on X about the history of the use of Aborted Foetal Tissues/Cells and it includes which cell lines were tested/used in COVID-19 'vaccines'.

Bit heavy but necessary to share the 'historical horror'.

<https://x.com/SharonC59122606/status/1971484898138652857>

Rgds.

Sharon

P.S. Useful to help people who value life and those of faith; who put their faith in vaccines without knowing what's in them (components and aborted foetal cell lines).

Julie Parker: ❤️

19:11:30 From Gerry C to Everyone:

I sent to my son the ABC article yesterday about trying to get compensation for vaccine injuries. Our 32 year old son, Gerard Janez C (look up his name and read his 'papers'), matriculated at 15 years of age from Xavier College Kew, the youngest ever year 12 student, and then by age of 25 became a psychologist, neuropsychologist and neuroscientist, Hi dad,

Please read the summary of this very thorough study on post-covid vaccination risks. You'll see that Guillain Barré syndrome (which is what the guy in the article you sent me had) was only a consequence of Astrozeneca. The worst that Pfizer did was inflame the heart in a reversible way. I agree that Australia's insistence on using Astrozeneca was misguided and incredibly political (because they helped fund it), but there really is no issue with Pfizer.

<https://www.bmj.com/content/384/bmj.q488>

Best,

Gerard

19:39:13 From Julie Parker to Everyone:

Fewer parents are jabbing their children - numbers have been continually dropping over the past 5 years. Herald Sun article states that cost has been the barrier - ha! It can't be due to the government and medical/pharma profession obliterating the trust that was once there? Parents are rightly taking the forward step in ensuring they are allowing their children to grow up healthy - and pharma and medical professions can keep their grubby, wealth-driven hands off them.
