Hi Everyone

I got home late tonight.

Have a look at the following

1- the Earth has lost 55% of it's magnetic field strength. The increase spread of aurora confirms this.

2- the magnetic poles are shifting, North pole toward Siberia and the South pole toward Argentina.

3- the Exosphere of Uranus is collapsing

4- Saturn's poles are moving rapidly

5- At current rates, our magnetic North pole will be in Bay of Bengal and South just west of Peru.

This means the Earth would have tilted 90degrees. Australia will be Japan currently is.

This is part of the ~ 12,000 year Disaster cycle

God be with you.....
